We are celebrating our 10º anniversary!

Here is a look back to what we have accomplished in the past decade. Click on each to know more!

**Madre Frutos**
Our new green jackfruit processing plant is open and full steam! We hired 12 local women and can process 20 tonnes of jackfruit per season. Through this model, we help conserve the forest creating green jobs!

**Campus**
Today, we have a 200ha. campus where you can find nature-based solutions labs, agroforest and reforestation areas, a Mandala Garden, guests and volunteer houses, meditation halls, an animal sanctuary, and a network of 20 kms of trails. We have planted 30,000 trees in our property!

**Land Stewardship**
We are scaling a land stewardship model for our 10,000ha. bioregion within three conservation units. Through initiatives such as Madre Frutos, Florestas do Amanhã and the Rio Green Belt, a 200 kilometer bike and hike trail connecting 4 regenerative hubs, we hope to stimulate regenerative businesses.

**Events and Learning Journeys**
We have hosted some 5,000 volunteers, students and guests from all over the world! Our largest event yet was Regenerarte in 2019, with 95 people from 12 countries, speaking Portuguese, Spanish and English!
